

Test booklet  
Nokia Lumia 800  
800 x 480 @ 252 ppi

In order to read text, the fontsize must be considerable, e.g. 22 px or more.

Unfortunately this makes pages with only 100 or 200 words on every page. But this has its advantages as well. Now text is even divided into smaller pieces to digest.

The pages contain buttons, they are used for forward, back, up and down paging.

On the next page we combine a photo with the buttons.

Another feature of the PDF lvl 5 is the possibility to include hyperlinks, e.g.

<http://www.ebooks-eguides.com>

which jumps via the internet to another system.
